Experience

Programming Intern - Company / Location

MONTH YEAR - Present

- Job Description: Interned as a programmer at a large software development firm, tasked with identifying and fixing bugs in apps and software programs
- Results: Debugged over 150 lines of code per day, surpassed the average coding speed by 34%, and reduced product inefficiencies by 24%
- Additional Competencies: Assisted with office tasks and research & development capabilities, including brainstorming, and product development
- Other: Attended bi-weekly team meetings, took notes, managed and organized data, and collaborated to plan departmental events and conferences

Software Development Intern - Company / Location

MONTH YEAR – MONTH YEAR

- Job Description: Interned as a software developer for a large firm in Silicon Valley and worked with industry leaders in data management software. Responsible for identifying and fixing bugs
- Results: Resolved over 30,000 bugs in existing lines of code and produced over 2,000 new lines for emergent products, and reduced the prevalence of bugs by 36%
- Additional Competencies: Assisted with managerial and office tasks, including copying, writing, and web development and design
- Other: Learned Python on the job to best meet expectations and was consequently offered a full-time position

Project Experience

- Geolocation App: Collaborated with three other students to build and develop a modern geolocation app to help users remember where they parked their cars
- Pet Finder App: Collaborated with two industry professionals to create, launch, and manage a popular app that helps re-connect pet owners with their animals using geolocation and tags
- Programming Club: Founded and led a programming club at my university with over 30 participants
