## Profile

To secure a construction project manager role with a reputable organization where I can use my experience and skills to successfully manage construction projects from conception to completion, ensuring timely delivery, cost-effectiveness, and customer satisfaction.

## Experience

### Project Manager - GenX Construction Company / Location

2018-2021

- Oversaw construction projects from start to finish, ensuring adherence to project timelines, budgets, and quality standards.
- Collaborated with architects, engineers, and contractors to develop project plans, budgets, and schedules.
- Monitored project progress, identified and resolved issues, and reported on project status to senior management.
- Led project meetings and regularly updated stakeholders on project progress and potential risks.
- Conducted site visits and inspections to ensure work was performed according to project plans and specifications.

### Senior Project Manager - House Development Corporation / Location

2015-2018

- Managed multiple large-scale construction projects simultaneously, overseeing project planning, budgeting, scheduling, and execution.
- Coordinated with design professionals, contractors, and other stakeholders to develop project plans and schedules.
- Conducted regular project meetings and provided regular progress updates to senior management and stakeholders.
- Developed and implemented project risk management strategies to minimize potential risks and maximize project success.
- Developed and maintained strong relationships with clients, vendors, and subcontractors to ensure project success and repeat business opportunities.

### Project Experience

- **Disaster relief:** Partnered with a disaster relief organization to help rebuild homes and communities after a hurricane.
- **Construction of a new playground:** Collaborated with a team to build a new playground for a local park, including installing equipment, laying down safety surfaces, and landscaping.
- **Restoration of a historic building:** Participated in a project to restore a historic building, including structural repairs, repointing masonry, and restoring original features such as windows and doors.
