## Experience

### Software Developer - Company / Location

MONTH YEAR - Present

- Job Description: Developed, tested, debugged, and documented over 40 software applications for 30+ firms.
- Outcomes: Improved software efficiency by 40%, contributed to 100% improvement and deployment within an agile scrum team, and developed 23 software application solutions for clients.
- Additional Competencies: Used established coding practices and methodologies, mentored three junior developers on best practices, and implemented a mentorship program for the firm.
- Others: Documented software changes and implemented a new data management system.

### Developer & Designer - Company / Location

MONTH YEAR – MONTH YEAR

- Job Description: Designed a mobile app to help users find small streamers on Twitch, facilitated migration to the new app, and managed app development and adjustments.
- Outcomes: Connected over 3,000 users to streamers, developed 100% RESTful API to control user functions, and created a mobile responsiveness UI with CSS grids.
- Additional Competencies: Integrating Twitch API data with CSS grids to facilitate gameplay and designing a front and back-end protocol to improve efficiency.
- Others: Managed a team of three designers and developers, led weekly meetings, and presented across departments.

### Project Experience

- Independent Streaming Highlighter: Provided mobile-first app design for independent streamers, adding features and removing bugs from separate apps.
- Hospitality Highlighter: Created an application to implement efficiency protocol in hospitality, including altering staff to service needs.
- Freelance Software Engineer: Provided cross-browser testing and remediation for independent clients as a contractor.
