MONTH YEAR – MONTH YEAR

- Assisted in the installation and assembly of new equipment, following blueprints, diagrams, and manufacturer's instructions.
- Conducted routine cleaning and maintenance of tools and equipment, ensuring they were in good working condition and safe to use.
- Responded to emergency maintenance requests promptly and assisted in resolving issues, minimizing downtime and production loss.
- Attended training sessions and workshops to enhance technical skills and knowledge of industry advancements and best practices.
- Worked with the maintenance supervisor to identify opportunities for process improvements and cost reductions, implementing solutions that optimize maintenance efficiency and reduce costs

Project Experience

- Developing and implementing a preventive maintenance program for a manufacturing plant – The maintenance technician works with the maintenance supervisor to identify critical equipment and develop a schedule for regular maintenance. They must ensure that maintenance activities are conducted according to the schedule to minimize downtime and improve equipment lifespan.
- Retrofitting an older building with energy-efficient lighting and HVAC systems – The maintenance technician works with a team of contractors to install new lighting and HVAC systems while minimizing disruptions to building occupants. They must ensure the systems are adequately maintained to optimize energy efficiency and reduce maintenance costs.
