## Profile

Gain a front-end engineering role at a company where I can help shape the engineering culture to adopt best practices and industry-standard technologies. Use my professional experience to advance company goals while continuing to expand my own skill set.

## Experience

### Front End Engineer - Company / Location

2021 – 2023

- Owned the engineering of several features within our software ecosystem.
- Designed and architected the solutions while adhering faithfully to mockups, providing design input where necessary.
- Continued to debug issues as they arose.
- Stayed current on Javascript best practices, libraries, and dependencies.
- Mentored our web development interns, and interviewed and onboarded new team members.
- Participate in daily stand-ups and weekly one-on-one meetings. Scheduled and lead some product meetings when relevant.

### Front End Engineer - Company / Location

2019-2021

- Overhauled legacy user interface with new JS, HTML, and CSS components for a cleaner, more intuitive user experience.
- Built and tested front-end Angular modules and API endpoints.
- Assisted with the implementation of a new linting and testing process.

### Project Experience

- Mapping App – personal project
