Profile

Currently a front-end developer with more than five years of experience. Primarily worked with recruitment companies to build staffing solutions for businesses. I utilized my technical skills to build user-friendly websites and applications. I am proficient with multiple tools, including TypeScript, Node.Js, and Agile.

Experience

Full-Stack Developer - Piper Companies/ Location
MONTH YEAR - Present
- Developed staffing solutions through client memberships, legal platform technology, and automated internal user experiences.
- Increased visitor time to the website by over ten minutes by creating an immersive user experience using Django. I developed more than 200 landing pages.
- Collaborated with a 10-person team of developers to renovate the company's application. We used CSS and JavaScript coding in our processing.
- Communicated with software engineers when developing and maintaining application UI to enhance system flow.
- Compiled internal resources for the data analytics team.

Front-End Developer - Bamboo HR/ Location
MONTH YEAR – MONTH YEAR
- Worked with eight other front-end developers and supported other employees in the tech department.
- Participated in code reviews and task estimations.
- Used React to migrate a multi-page UI to a single-page application to increase customer engagement by 10%
- Created a navigated walkthrough of the company's services using HTML and CSS and enhanced consumer adoption by around 30%. In turn, the company's revenue increased by about $1.2 million.
- Built, tested, planned, and released new features using Angular and TypeScript.

Project Experience
- Worked on developing a job app for a recruitment firm. I implemented the project with React Redux and created a filter feature for qualification checks based on skills and education. The application garnered over 50,000 users.
- Assisted in creating an e-commerce website for a local fashion brand. The website hosted order summaries, memberships, product lists, and other landing pages.
