Certified respiratory therapist with over 10 years of experience in the field. Has excellent equipment management skills and communication traits.
Dedicated to providing the highest quality care and streamlining workflow.

Experience

ICU Respiratory Therapist- Company / Location

2020 to present

- Provided critical adult respiratory support in the ICU.
- Set up and operated conventional and high-frequency ventilation.
- Assessed patients before and after treatments to evaluate effectiveness.
- Implemented new treatments and procedures under doctor supervision.
- Provided around-the-clock special care for tracheostomy patients.
- Assisted with traumas in the emergency room.
- Ensured respiratory therapist interns followed protocols and effective care practices.

Respiratory Therapist - Company / Location

2018 to 2020

- Designed and implemented several treatment plans for patients.
- Worked with doctors and nurses to provide care for patients in critical conditions.
- Educated patients on how to use assistive medical devices.
- Monitored patients on BiPap and CPAP with no supervision.
- Prepared over 20 diagnostic tests a day for multiple patients.

Project Experience

- Conventional vs. High-Frequency Ventilators: conducted research on the benefits of each device.
- Arterial Gas Interpretation: instructed interns on reading test results.
- Patient and Family Advocacy: talked to caregivers about listening to patient needs.
