Profile

A skilled Industrial Maintenance Technician with over five years of experience seeking a challenging position in a manufacturing or production facility where I can utilize my technical knowledge and troubleshooting skills to ensure the smooth operation of equipment and machinery. I am looking to contribute to a company's success while continuously improving my skillset in industrial maintenance.

Experience

Enter Job Position Here - Company / Location

MONTH YEAR - Present

- Conducting regular maintenance and repairs on industrial machinery and equipment, including diagnosing and troubleshooting issues, replacing defective parts, and performing preventative maintenance tasks to minimize downtime.
- Collaborating with production and engineering teams to identify opportunities for equipment optimization and process improvement and providing recommendations for upgrades or modifications to enhance efficiency and productivity.
- Maintaining accurate records of maintenance activities, including work orders, parts inventory, and equipment performance data, and using this information to identify trends and opportunities for improvement.
- Responding to emergencies and breakdowns promptly and effectively, working quickly to diagnose and resolve issues to minimize downtime and ensure the safety of personnel and equipment.
- Providing training and guidance to junior technicians and apprentices, sharing knowledge and expertise to help develop their skills and improve overall performance.

MONTH YEAR – MONTH YEAR

- Operating and maintaining electrical, mechanical, hydraulic, and pneumatic systems, ensuring that all equipment functions optimally and adheres to safety regulations and standards.
- Conducting routine inspections of industrial equipment and systems, identifying potential issues before they become significant problems, and implementing corrective measures to avoid downtime and minimize repair costs.
- Maintaining a clean and organized work environment, including cleaning and lubricating machinery, disposing of waste materials, and organizing tools and equipment for easy access.
- Participating in plant shutdowns and start-ups, ensuring all equipment is appropriately maintained and ready for use, and providing support during the shutdown and startup processes.
- Coordinating with vendors and suppliers to order and receive parts and equipment, maintaining proper inventory levels, and ensuring all equipment complies with company standards and regulations.

Project Experience

- Coordinated with a cross-functional team to implement a new computerized maintenance management system (CMMS), resulting in improved tracking of work orders and maintenance tasks, increased efficiency in maintenance processes, and a 15% reduction in downtime.
- Led a project to replace outdated machinery with state-of-the-art equipment, resulting in a 40% increase in productivity and a 25% reduction in maintenance and repair costs.
- Collaborated with a team of technicians to retrofit the lighting system in a warehouse with LED lighting, resulting in a 30% reduction in energy costs and improved lighting quality.

Education

Applied Science in Industrial Maintenance Technology -

Georgia Northwestern Technical College,

Skills

Expertise

- Strong problem-solving abilities to troubleshoot complex maintenance issues.
- Excellent communication skills to interact with team members and managers effectively.
- Detail-oriented and highly organized to maintain accurate records and schedules.
- Ability to work independently and in a team environment to meet project and maintenance needs.
- Strong time-management skills to prioritize tasks and manage multiple projects.

Licenses & Accreditations

Licenses Licenses & Accreditations

- Certified Maintenance & Reliability Professional (CMRP)
- Occupational Safety and Health Administration (OSHA) 10/30-Hour Certification
- National Institute for Metalworking Skills (NIMS) Industrial Technology Maintenance (ITM) Certification
- Electrical License
- Hydraulic and Pneumatic Certifications
