Profile

Land an LVN position where I can reignite my passion for nursing while incorporating my continued education skills and knowledge.

Experience

LVN - Company / Location

MONTH YEAR - Present

- Monitored vital signs, dispensed prescriptions (under the supervision of a certified nurse or physician), bandaged wounds, collected specimens for laboratory testing, and aided with daily living tasks such as cleanliness, nutrition, and movement.
- Maintained complete and accurate patient records, including vital signs, medication administration records, progress notes, and other relevant information.
- Informed registered nurses, doctors, and other healthcare workers of any changes in patient circumstances in order to coordinate and provide complete patient care.
- Provided patient education on many issues, such as medication instructions, post-operative care, illness management, and lifestyle adjustments is provided.
- Assisted the healthcare team by working with nursing assistants, unit clerks, and other support employees to provide timely patient care and a smooth workflow.

LVN Intern - Company / Location

MONTH YEAR – MONTH YEAR

- Vital signs, personal cleanliness, medication administration, and patient monitoring were all activities I assisted with while working under close supervision.
- I had the opportunity to consult with a registered nurse to learn the value of thorough documentation and the best methods for including it in clinical charts.
- Observed RNs routinely to examine how they cared for their patients, what indicators they looked for, and how they handled certain situations.
- I helped nurses educate and support patients and their families by answering questions, showing self-care strategies, and explaining medicines.
- Safeguards for patients, their families, and healthcare workers were thoroughly established via infection control procedures, good hand hygiene, and other measures.

Project Experience

- Created educational materials, conducted group sessions on specific health topics, and developed individualized care plans to promote patient understanding and self-care.
- Served on a team project to reduce hospital-acquired infections by implementing strict infection control protocols throughout the building.
- Took the lead in auditing department patient charts while providing feedback to colleagues and implementing changes to enhance documentation quality.
