## Profile

I am a patient and dedicated social worker with clinical experience in small and large community hospitals. My ten years of experience have enabled me to work on emerging medical cases in high-capacity organizations. I'm seeking a challenging position to support patients and staff.

## Experience

### Medical Social Worker II - Maryland Medical Center / Nottingham, MD

January 2020 - Present

- Manage and supervise social work staff in the medical center. Occasionally offer training to interns to equip them with social work skills and knowledge.
- Responsible for coordinating access to patient resources and hiring new social work staff.
- Communicate and use the proper channels with physicians and patients.
- Create appropriate discharge plans by working with the patient or their family. Connected social workers are available within community-based organizations for patients who are critically ill and lack caregivers.
- Ensure there is a continuation of patient care by acting as a resource for patient information.

### Medical Social Worker I - Winchester Medical Center / Winchester, VA

December 2018 – December 2019

- Provided therapy to patients and families experiencing social and emotional conflict.
- Leverage exceptional communication skills to provide outstanding care in a high-capacity healthcare facility. Increased my patient satisfaction scores by 25%.
- Performed case findings screenings to accomplish the hospital's goals of quality patient care.
- Identified areas of need in the community and allocated resources.
- Supervised weekly interdisciplinary meetings to review patient care plans and review critical cases to formulate solutions for them.

### Project Experience

- Initiated a program to help drug and substance abuse victims have a sustainable plan to keep them away from triggers leading to relapse.
- Participated in several home-based care treatment programs for the senior population in the community.
