Experience

Internal Medicine Clinical - Oschner Health Academic Medical Center/ Location

MONTH YEAR - Present

- Performed comprehensive physical examinations and developed treatment plans for a culturally and linguistically diverse patient population.
- Ordered and interpreted diagnostic tests, including lab panels, MRIs, CAT scans, and X-rays.
- Collected and documented lab specimens.
- Educated patients and families on disease management, medication adherence, and lifestyle modifications.
- Assisted in routine surgeries.

Emergency Medicine Clinical - Oschner Health Academic Medical Center/ Location

MONTH YEAR – MONTH YEAR

- Assessed, diagnosed, and treated patients presenting with acute medical conditions under the supervision of physicians in the emergency department, which intakes 280 patients per day.
- Assisted in triage and wound care, just as suturing and splinting.
- Communicated with patients and families to address concerns and provide progress updates.
- Performed rapid trauma assessments by ordering and examining radiology and laboratory tests.
- Educated diverse patient demographics about their health and care plans in their native language to ensure equitable healthcare access to that of English-speaking patients.

Project Experience

- Senior Capstone Project: “The Impact of Telemedicine on Patient Access to Healthcare”
- Conducted research on advancements in telemedicine and its benefits for patients in rural and underserved communities.
- Compiled and analyzed data showing the successful implementation of rural telemedicine initiatives.
- Rural Healthcare Initiative
- Participated in a summer project focused on providing wellness exams to those living in rural areas around the community.
- Assisted with in-home patient consultations, physical exams, treatment plan development, and condition management with more than 150 individuals.
