Experience

Enter Job Position Here - Abbott Northwestern Hospital-Pediatrics/ Location

MONTH YEAR - Present

- Educated patients' parents regarding medical diagnosis and instructed them on appropriate care steps for treatment.
- Provided bedside care for young patients afflicted with chronic diseases and injuries in the pediatrics unit.
- Efficiently organized patient records and medical history. The records include current medications and symptoms to guarantee an accurate diagnosis.
- Executed throat cultures, catheterizations, nasal swabs, and lab requirements successfully.
- Cooperated with a multidisciplinary team to create and apply individualized care plans; in line with hospital standards and patient needs.

Children's Minnesota Hospital - St.Paul-Pediatrics/ Location

MONTH YEAR – MONTH YEAR

- Supported child patients in need of bathing, feeding, and other activities of daily living. I also emotionally supported vulnerable and disabled children who needed specialized care.
- Followed safety protocols appointed by the hospital by conducting sterilization, cleaning, and disinfection procedures.
- Effectively communicated with the registered nurse team; to care for young patients in a 40-bed pediatric unit.
- Supervised essential medical documents and provided them promptly to the assigned doctor.
- Assisted doctors during major surgical procedures, such as Hernia repairs and correctional spine abnormalities.

Project Experience

- Conducted research on a nurse's role in preventing infant and under-five child mortality.
- I wrote a paper regarding nursing intervention on exclusive breastfeeding habits for pregnant women. The supervisor gave a positive response.
