Proin gravida nibh vel velit auctor aliquet. Proin gravida nibh vel velit auctor aliquet. Aenean sollicitudin, lorem quis bibendum auctor, nisi elit consequat ipsum, nec sagittis sem nibh id elit. Duis sed odio sit amet nibh ipsum.

Experience

Student Nurse Technician - AdventHealth Altamonte Springs/ Location

MONTH YEAR - Present

- Safely moved patients to several treatment centers. I accounted for patient specifications when transferring them from their bed to wheelchairs. I also followed proper hand sterilization and identification protocol when handling the patients.
- Skilled in placing catheters and intravenous lines for patient care. Before administration, I carefully reviewed the assigned physician's requirements.
- Tracked demographic information, such as weight, height, and other vital signs. I've performed this action on over 30 patients daily.
- Assisted certified nurses with removing urinary catheters, collecting stool and urine samples, and emptying drainage tubes or receptacles.
- Assessed patients' physical well-being through observations, interviews, and additional examinations.

Patient Care Technician - HCA Florida West Hospital/ Location

MONTH YEAR – MONTH YEAR

- Provided patient support for the daily living activity. I made sure to use easy-to-understand body language and quiet tones to assist the patient.
- Oversaw cardiac, oncology, and diabetic patients. I supported the registered nurse during treatments, diet planning, and medical oversight of the patients.
- Offered emotional care, supervision, and companionship to senior patients affected by Alzheimer's.
- Complied with safety sterilization protocols through disinfection procedures. I also maintained records of the sterilization procedures, items, equipment, and supplies for better tracking.
- Knowledgeable with abscess drains, nasogastric tubes, rectal tubes, and JP drains. I monitored patients who required this procedure for symptoms of sepsis in the ongoing process and kept the medical team notified of any irregularities.

Project Experience

- I collaborated on a research piece targeting infection control among midwives. The paper covered developing nations struggling with widespread Malaria infections.
- Staying in theme with the previous project, I presented a final project regarding the practice of standard precaution among healthcare workers.
