Experience

Web Developer- Company / Location
2016 to 2018
- Initiated the transition from firebase to AWS*, saving the company $2,000+ in monthly fees for technical and customer support. The transition also increased load speeds by up to 50%, improving user experience and search engine optimization (SEO)
- Created various web designs in Figma, InVision Freehand, and Wireframe.cc for company clients
- Developed applications using JavaScript and Python to teach interns and new members of the company's best practices and standards, increasing work efficiency by 25%
- Coached a team of junior designers on how to use advanced web development tools, such as NGINX, Angular.JS, Sublime Text, and Sass
- Wrote and reviewed code for well-known websites such as Forbes, FeedBurner, Paypal, and Dailymotion

Web Designer - Company / Location
2014 to 2016
- Built mock wireframes and designs for The New York Times' upcoming projects
- Collaborated with Shane Mielke (UI/UX Designer) and Dan Cederholm (SimpleBits founder) to create NameIt, a brand identifier app and website that allowed users to identify and learn about niche brands or products
- Founded OnceUpon, an accessible open-source software for web developers. As of January 2023, it's been used by 100,000 people
- Optimized hundreds of company websites for maximum speed and scalability.
- Liaised with back-end developers to ensure web functions and landing pages are properly integrated

Project Experience
- Lead developer of Umbrella, an editing app that allows users to edit their photos and videos with augmented reality visuals (3D texts, bitmojis, etc). As of January 2023, it amassed 1 million downloads on both Google Play and App Store
- Conceptualized object-oriented web applications in Node.js and React.js to increase target audience engagement by 15%
- Developed a furniture sales website with HTML, JavaScript, PHP, and MailChimp for freelance woodworkers. The website receives over 40,000 active users every month

Education
to June 2016.

Bachelor in Computer Science - Carnegie Institute of Technology   *May 2012*

- GPA: LIST
- AWARD
- AWARD

Masters in Computer Science - Carnegie Institute of Technology
September 2017 to June 2019.
