TITLE

000-000-0000 / EMAIL / CITY, STATE, ZIP

Profile

Results-driven cyber security professional with a proven track record in successfully leading and delivering complex projects. Seeking a challenging role where I can leverage my project management skills, technical expertise, and deep understanding of cyber security principles.

Experience

Cyber Security Project Manager - Null Tech Inc. / Chicago, IL

May 2022 – December 2022

- Led a cross-functional team in successfully implementing a company-wide data encryption project, ensuring the protection of sensitive information and compliance with regulatory requirements.
- Developed and executed a comprehensive incident response plan, minimizing the impact of security breaches and reducing response time by 30%.
- Managed to deploy an advanced security information and event management (SIEM) system, enhancing real-time threat detection capabilities and improving incident response efficiency.
- Conducted risk assessments and vulnerability scans to identify security gaps, resulting in implementing proactive security measures and reducing potential threats by 20%.
- Collaborated with stakeholders to develop and implement security awareness training programs, significantly improving employee adherence to security policies and procedures.

Cyber Security Analyst - Hook IT Agency / Miami, FL

May 2021 – February 2022

- Performed in-depth network traffic and system logs analysis, identifying and investigating potential security incidents and breaches.
- Conducted vulnerability assessments and penetration testing on critical systems and applications, recommending and implementing security controls to mitigate identified risks.
- Monitored and responded to security alerts, promptly investigating and containing security incidents to minimize damage and downtime.
- Assisted in developing and implementing security policies, procedures, and standards in alignment with industry best practices and compliance requirements.
- Collaborated with incident response teams to develop and enhance incident response playbooks, ensuring efficient and effective responses to security events.

Project Experience

- Led a project to upgrade the organization's security infrastructure.
- Conducted a thorough assessment of existing systems, identified vulnerabilities, and recommended suitable upgrades and enhancements.
