Profile	I have been a Senior Software Engineer for more than eight years. I am results-driven and interested in applying my leadership skills to enhance employee coding performance and quality. My technical skills include project management, database management, and UI design. My problem-solving extends to technical and managerial points.

Experience

Senior Software Engineer - Lyft/ Location
MONTH YEAR - Present
- Worked with a 30-personnel team to re-configure the application for a more user-friendly experience for upwards of 12.5 million riders.
- Enhanced geo-transit data applications for riders and drivers to improve user content by over 30%.
- Oversaw and reviewed code developments by associate Software Engineers and ensured quality and knowledge distribution.
- Trained over 20 Software Engineer recruits by familiarizing them with company standards and coding practices.
- Created well-crafted code to maintain the company's roadmap and architecture to cater to its needs.

Associate Software Engineer - Google/ Location
MONTH YEAR – MONTH YEAR
- Read, debugged, designed, and reviewed codes. I also ran tests and wrote unit tests.
- Crafted creative work solutions to optimize the workflow by decreasing project roadblocks throughout the project process.
- Settled disputes within the junior Software Engineer team. I also served as an SME for Google coding functions.
- Engaged in software performance analysis, demand forecasting, system tuning, and service capacity planning.
- Assisted in training five Software Engineer interns. I guided them through Google's software workflow and communicated their responsibilities and expectations efficiently.

Project Experience
- In my initial experiences, I collaborated on developing a mobile app for a FinTech company. The application worked like an e-wallet system, tracking cashflows and creating in-store payments.
- Worked on a freelance project to develop a website for a fashion store client. Used HTML and UI design during implementation. The client was satisfied with my work and positively rated my work.

Education

Bachelor of Science in Software Engineering -
California Polytechnic State University
MONTH YEAR
- GPA: LIST
- AWARD
- AWARD

DEPARTMENT - SCHOOL
May 2009
- GPA: LIST
- AWARD
- AWARD

Skills

Expertise
- JavaScript
- UI Design
- Project Management
- Leadership
- Database Management

Licenses & Accreditations

Licenses Licenses & Accreditations
- Project Management Professional Certification
- Leadership and Management Certification from the University of Pennsylvania
- Certified Software Development Professional from the IEEE Computer Society
