Profile

Credentialed software engineer with ten years of experience in software quality assurance and testing seeking a full-time position where I can leverage my software testing and UX design skills.

Experience

Software Test Engineer - Company / Location

MONTH YEAR - Present

- **Job Description:** Completed software testing for a major technology firm and led a team of six engineers in implementing SDLC and STLC.
- **Outcomes:** Improved productivity by 24%, sustained a 95% on-time-completion rate for all software testing protocols, and successfully delivered 12 releases using regression testing.
- **Additional Competencies:** Led weekly meetings, coached other engineers, planned testing protocol, and generated intra-departmental reports.
- **Other:** Earned the "Excellence Award for Leadership" two years in a row.

Software Test Engineer - Company / Location

MONTH YEAR – MONTH YEAR

- **Job Description:** Served as a software test engineer for a small technology firm, working with four peers to create deliverable assets, improve software products, and conduct analyses of systems.
- **Outcomes:** Reduced error rate by 25%, upheld a 90% software testing success rate, and increased efficiency by 43%.
- **Additional Competencies:** Created weekly and monthly status reports, coached junior employees, and created presentations for stakeholders.
- **Other:** Led the summer internship program and supported 20 interns in developing the skills necessary to become software engineers.

Project Experience

- **Volunteering:** Volunteered to help small businesses develop and design apps and websites.
- **Internship:** Interned as a QA software test engineer at Apple and developed quality assurance skills and programming language proficiency.
- **Mentor:** Mentored over 30 employees in my field to help them develop the skills necessary to become successful software test engineers.
