Experience

Trauma Unit Nursing Assistant - Children's Medical Center/ Location

MONTH YEAR - Present

- Obtained and recorded patients' vital signs, blood glucose, intake, and output regularly to ensure progress
- Assisted patients with routine activities such as going to the bathroom, showering, eating, and dressing
- Diligently followed isolation precautions to control infection risks and protect trauma patients
- Obtained urine samples and stool samples for urinalysis
- Developed experience with patient positioning, EHR software, JP drains, abscess drain, and rectal tubes

Clinical Rotations - NYU

April 2021- April 2022

- Completed six clinical rotations as part of the nursing school curriculum in several units, including pediatrics, geriatrics, ICU, and med-surg
- Learn to use five different EMR systems, including Epic and Allscripts
- Monitored patient vital signs for changes and concerning symptoms by performing detailed medical assessments and informing the charge nurse of their status
- Successfully performed CPR on two patients during an ICU rotation
- Assisted eleven nurses in a single shift, anticipating their needs and helping to communicate medical situations to patients and their families

Project Experience

- Volunteered at nursing homes and care centers throughout high school
- Created a routine system to check on patients for emotional distress to ensure they feel heard and cared for
