Profile

I'm an experienced UX and UI designer looking to put my skill to use in a creative, innovative, and dynamic organization. With three years of experience working closely in UX and UI design, I'm eager to implement what I know, hone my skills, and improve the overall user experience and user interface on platforms for clients.

Experience

UX Designer - Company / Location

MONTH YEAR - *Present*

- Collaborated with UX and UI designers to develop the best possible user interfaces for clients.
- Research design elements and incorporate them into a website or app to ensure client satisfaction.
- Conduct user testing to see how new designs work in real time before officially solidifying the design and showing the client.
- Implement new design methods to improve upon previous projects when necessary or at the request of the client.

UI Internship - Company / Location

MONTH YEAR – MONTH YEAR

- Met with clients to discuss their brand, goals, and needs for a website or other platform users will access.
- Collaborated with other UI and UX designers to develop the best possible design for each client.
- Use visual design and coding to develop a beautiful yet functional website with few problems.
- Analyze the user interface and determine if improvements are needed and, if so, where.

Project Experience

- Designed a new website for a brand: Assisted a new brand in designing an easy-to-use website that encouraged website visits and helped to drive sales when they officially opened.

Education

Bachelor's Degree in Website Design - University of California

MONTH YEAR

- GPA: 3.6

High School Diploma - Los Angeles High School

May 2009

- GPA: 3.8
